

I am writing concerning the possible loss of the K-Love broadcast station in my area and around the country due to the Low Power FM stations' priority over current FM translator services. I believe it would be a devastating loss to me and to thousands of others because K-Love is the only music station I listen to on the radio. It is a positive and uplifting place to listen to Christian music that I love and enjoy daily. K-Love offers a station that is safe for everyone in the family to listen to without fear of inappropriate content for younger listeners. I also like that K-Love does not have commercials but instead, periodically does pledge drives to raise the money they need for all their operating costs. In conclusion, I ask that the FCC would decide not to give priority to the Low Power FM translators because the loss of K-Love would be a sorrowful occurrence. Thank you for your time and your consideration of this issue.
